SAHIR UL ISLAM

Full Stack Developer (React.js, Node.js, MongoDB, Express.js)

Srinagar, Jammu and Kashmir, India | +91-7051747966 | sahir.masoodi@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience designing and delivering scalable web applications using React.js, Next.js, Node.js, Express.js, and MongoDB. Built 20+ reusable UI components and 15+ REST API endpoints, managed Redux state across multiple Redux slices, and improved application performance through code optimization and responsive design with Tailwind CSS. Delivered English & Arabic localization for 30+ screens, expanding platform accessibility to Arabic-speaking users. Experienced in Agile/Scrum environments with sprint planning, code reviews, and cross-functional collaboration.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Redux, Redux Toolkit, Mongoose, MongoDB, Tailwind CSS, React Router, Context API

Tools & Platforms: Git, GitHub, VS Code, Postman, Vite, REST APIs, Agile/Scrum, CI/CD basics, GitHub Pages

WORK EXPERIENCE

Full Stack Developer | Student Diwan (Remote) **May 2025 - September 2026**

- Built and optimized 15+ frontend features and reusable components using React, Redux Toolkit, and Tailwind CSS, improving UI responsiveness and reducing average page load time by ~30%
- Designed and maintained 10+ REST API endpoints using Node.js, Express, and MongoDB to support core application modules including authentication, scheduling, and content management
- Collaborated within a 5-member Agile team across weekly sprints, participating in sprint planning, daily stand-ups, and 20+ peer code reviews

Full Stack Developer | Webkraft IT Solutions (Remote) **March 2024 - April 2025**

- Built 20+ responsive, reusable UI components using React, JavaScript, and Hooks, reducing duplicate code across 3+ projects and cutting new feature development time by ~20%
- Integrated 10+ REST APIs and third-party tools (payment, notification, and analytics services) to enable seamless end-to-end functionality across client applications
- Collaborated in Agile teams across 12+ sprint cycles, contributing to backlog grooming and completing 50+ peer code reviews to maintain code quality
- Enhanced application performance by refactoring component rendering and API calls, improving page load speed by ~25% and resolving 30+ UI/UX bugs to enhance overall user experience

PERSONAL PROJECTS

Doctor Appointment Web Application Link

- Developed a full-stack doctor appointment booking platform supporting 3 user roles (patients, doctors, admins) with role-based access control
- Engineered real-time appointment scheduling and status tracking, reducing manual booking coordination steps by an estimated 40%
- Designed a fully responsive UI using React, Vite, and Tailwind CSS, ensuring consistent experience across desktop and mobile devices

SortNova - Sorting Algorithm Visualizer Link

- Built a responsive sorting algorithm visualizer using React, Vite, and Tailwind CSS, supporting Bubble Sort, Merge Sort, and Quick Sort with real-time animations
- Added dynamic array size (up to 200 elements) and adjustable speed controls for interactive algorithm learning

EDUCATION

Bachelor of Technology (B.Tech) in Electrical Engineering **Aug 2019 - Sep 2023**
